

Matias Donato

Full Stack Developer

matiasdonatoit@gmail.com | Phone +54 9 11 6209-1233 | Saavedra, Buenos Aires - Argentina | [Portfolio](#) - [LinkedIn](#) - [Github](#)

I am an Argentine developer with 3 years of experience working on projects using technologies such as JavaScript, TypeScript, React, Redux, Node.js, Express, AWS, Sequelize, MySQL, among others. I can develop web applications from scratch, including both front and back development, as well as database management.

I consider myself a proactive, creative individual with a positive attitude, strong organizational and teamwork skills, good handling of Git Flow, problem-solving abilities, a wide capacity for learning, and a good level of English.

I am currently working at **LA NACION**, a well-known Argentine news portal which also has a benefits and discounts program: **Club LA NACION**. There, I work closely with other developers as well as design, QA, and architecture teams, using various technologies in combination with my knowledge to maintain the platform and create new, modern, and scalable features.

TECH SKILLS

JavaScript, TypeScript, React, Redux, Next.js, Node.js, Express, AWS, Nest.js, Jest, Docker, Sequelize, MySQL, PSQL, DynamoDB, MongoDB, Tailwind, Bootstrap, HTML, CSS, Git, Github, Azure DevOps, Figma.

RECENT EXPERIENCE

Full Stack Developer – LA NACION

August 7, 2023 - Present

LA NACION, Buenos Aires, Argentina.

- I work alongside a team of developers and designers to shape the LA NACION and Club LA NACION websites. We use technologies such as React, Redux, and TypeScript for front-end development, while for the back-end, we employ Node.js, Express, and AWS. This allows us to create APIs in combination with services like Lambdas, API Gateway, CloudFormation, S3 Buckets, EventBridge, among others. Additionally, we manage our databases with MySQL and DynamoDB, achieving a diverse and efficient data management. Our development process is guided by version control in Git, and we follow Scrum methodologies to ensure efficient project execution.

Full Stack Developer – IT Patagonia

Nov. 30, 2022 - July 31, 2023

IT Patagonia, Buenos Aires, Argentina.

- At IT Patagonia, I worked on various projects alongside different teams to develop web applications with dynamic and attractive interfaces, ensuring code security with TypeScript and building scalable back-end systems. To achieve this, I used a set of technologies including React, Redux, TypeScript, Node.js, Express, Nest.js, and MySQL, among others.

Full Stack Developer - ALTER LEARNING

July 1, 2021 - Nov. 23, 2022

ALTER-LEARNING EDUCATIONAL PLATFORM, INC.

Davis, California.

- As a Full Stack developer, my responsibility was to create applications that offer interactive and engaging educational experiences on an e-learning platform. To achieve this, I used technologies such as React, TypeScript, Node, Express, MySQL, and MongoDB, among others. My goal was to leverage these technologies and my expertise to create innovative and seamlessly integrated user experiences for our platform's users.
